

# Advent of IPv6

- ▶ Freelance Consultant
- ▶ Started with Linux when it shipped on 35 floppy disks
- ▶ Networking since 2002
- ▶ IPv6 since 2007

# How it started

- ▶ It all started with the question “How do you test if someone knows IPv6?”

# How it started

- ▶ It all started with the question “How do you test if someone knows IPv6?”
- ▶ There are a lot of self-proclaimed experts who never ever have configured IPv6 anywhere

# How it started

- ▶ It all started with the question “How do you test if someone knows IPv6?”
- ▶ There are a lot of self-proclaimed experts who never ever have configured IPv6 anywhere
  - ▶ Some of them even have “relevant” certifications (\$Vendor Networking Professional)

# How it started

- ▶ It all started with the question “How do you test if someone knows IPv6?”
- ▶ There are a lot of self-proclaimed experts who never ever have configured IPv6 anywhere
  - ▶ Some of them even have “relevant” certifications (\$Vendor Networking Professional)
- ▶ **Solution:** Make a test where they have to configure / troubleshoot

- ▶ There are a lot of self-proclaimed experts who never ever have configured IPv6 anywhere
  - ▶ Some of them even have “relevant” certifications (\$Vendor Networking Professional)
- ▶ **Solution:** Make a test where they have to configure / troubleshoot
  - ▶ So no or little Multiple choice

# I had a strange idea

- ▶ Let's make that fun

# I had a strange idea

- ▶ Let's make that fun
- ▶ Maybe let people win something (e.g. T-Shirts)

# I had a strange idea

- ▶ Let's make that fun
- ▶ Maybe let people win something (e.g. T-Shirts)
- ▶ Borrow some ideas from other events:
  - ▶ Advent of Code <https://adventofcode.com/>
  - ▶ Advent of Cyber <https://tryhackme.com/r/christmas-2023>

# Advent of Code

Advent of Code is an Advent calendar of small programming puzzles for a variety of skill sets and skill levels that can be solved in any programming language you like. S: (<https://adventofcode.com/2024/about>)

# Advent of Cyber

Tackle interactive tasks across various areas of cyber – from hacking actual machines to defending digital realms. Unravel a thrilling story and gather evidence to foil McGreedy's dastardly plans! S:  
(<https://tryhackme.com/r/christmas-2023>)

## Does not have to be Christmas related

- ▶ Can be anything else, e.g.
  - ▶ “20 days before RIPE”

# So what is needed?

- ▶ Ideas for tasks

# So what is needed?

- ▶ Ideas for tasks
- ▶ Only Linux? Only \$Vendor? Multiple choices?

# So what is needed?

- ▶ Ideas for tasks
- ▶ Only Linux? Only \$Vendor? Multiple choices?
- ▶ Tasks should be from easy to hard

# So what is needed?

- ▶ Ideas for tasks
- ▶ Only Linux? Only \$Vendor? Multiple choices?
- ▶ Tasks should be from easy to hard
- ▶ Should be accessible, as in only needs a browser / ssh

# So what is needed?

- ▶ An idea how to present these tasks
- ▶ Advent of cyber uses the story of the Grinch sabotaging Christmas

# So what is needed?

- ▶ Sponsors
  - ▶ If we build labs we need infrastructure
  - ▶ If we want prices they need to be paid **and** shipped

# So what is needed?

- ▶ People
  - ▶ someone has to build, run, maintain and troubleshoot the whole setup
  - ▶ also: graphics, texts, project management

So...

- ▶ stupid idea or something you would be willing to work on?
